EXPERIENCE

Games for Entertainment and Learning Lab (GEL), East Lansing, Michigan — Programmer

March 2016 - PRESENT - <http://gel.msu.edu/>

Scouted by my professor to be hired as a programmer and game developer at MSU GEL lab using the Unity game engine. Clients have included the MSU Federal Credit Union, Michigan State University, and Brain Powered Games. I use Unity3D, Visual Studio, and C# to develop games for desktop and mobile platforms. Responsible for meeting deadlines as part of a team of programmers, artists, and designers.

Home Depot, Woodridge, IL — Overnight Freight Team

May 2015 - Aug 2015

Mondelēz International, Deerfield, IL — Database Intern

June 2014 - Aug 2014

EDUCATION

BS, Michigan State University, East Lansing, MI— Computer Science, Minor in Game Design

Aug 2013 - May 2017

Enrolled in Computer Science with a minor in Game Design and Development. Graduating May 2017.

PROJECTS

Chroma Cannon — A Multi-platform gaming experience

A seeming simple game developed four times into PC(2d and 3d), Native Android, and the Nintendo 3DS.

VESTA — Virtual Reality Winery and Oenology

Learn the steps of wine creation through interactive minigames using the HTC Vive VR Set. I created a simulation that guides the player through using a press to squeeze their collected fermented grapes.

Isotopolis — Procedural Isotope Discovery

Programmed the tutorial UX for this game about the process of discovering rare isotopes. Used the Unity game engine to distribute our game onto Android, iOS, and WebGL.

Brain Powered Games Maze Training — Brain Stimulation

Developed the seeded random maze generation for this game which was designed to stimulate brain activity and growth through memory and repetition. Used the Unity game engine for PC desktops.
